Hamburg, September 2014

REACH Legislation

Dear Sir/Madam,

The principle aims of the REACH legislation are to ensure a high level of protection of human health and the environment from the risks related to exposure to chemicals and to enhance innovation and competitiveness of the chemicals industry within the European Union.

Please be assured that Alroko GmbH & Co KG is wholeheartedly committed to the REACH process, its principles and to the continuity of supply to our customers.

We are a member of the REACH Competence Network Hamburg for several years already to ensure that we are always up to date with the newest aspects of the regulation. For details see: www.reach-hamburg.de/index.php?id=14

Additionally, we have co-operations with partner companies to ensure full compliance and to provide the right data and documentation.

As an importer we pre-registered several products ourselves and intend to register within the applicable deadlines. Furthermore, we have been appointed as Only Representative (OR) for manufacturers from outside the EU to register substances supplied to the European market on their behalf.

An audit by the Amt für Arbeitsschutz, Hamburg (Government Agency for Occupational Health and Safety, Hamburg) in July 2013 declared that our documentation system of imports and products is complete and suitable for ensuring legal compliance.

If you have further questions, please do not hesitate to contact us.
